With the proper shop equipment the repair work can be done better, quicker and cheaper. If I had not spent about seven years of my life in large machine shops and learned the value of real tools, I perhaps would be shifting along with a few hand tools. The machine shown above is as good a cylinder reboring machine as can be bought. This machine will bore any cylinder up to 8 inches in diameter and 22 inches deep. We guarantee to work to one thousandth of an inch and we have the instruments to know when we are working within these measurements.
